

Hallockville Farm Camp

*COVID-19 Protocols for 2022**

Although there has been substantial progress in controlling the spread of COVID-19, the virus remains a concern and the health of campers, families, and staff continues to be Hallockville's top priority. It is important to recognize that many children under 12 years old and a considerable number of adults have not been vaccinated. With these realities in mind, the following protocols will be implemented in 2022.

General Protocols

Campers will:

- not be required to wear face coverings under most circumstances.
- may be required to wear face coverings when in enclosed spaces that do not provide for adequate physical separation and/or ventilation.
- not be permitted to share food, snacks, or drinks
- may receive temperature checks prior to daily drop-off.
- **not be permitted to attend camp** when their temperature is 100.4 degrees or higher or otherwise do not feel well.
- be encouraged to hand sanitize.
- be immediately isolated if they become ill during the camp day.

Family Responsibility

Keeping campers healthy is a shared responsibility and so we would greatly appreciate your cooperation and assistance as follows:

- educating campers about minimizing exposure to COVID-19.
- reminding campers that they follow the directions of camp staff.
- educating caregivers about minimizing exposure to COVID-19.
- most important-- do **not** come to camp if your camper has an elevated temperature (i.e., 100.4 F or higher); is experiencing COVID-19 symptoms; or otherwise does not feel well. The child will not be permitted to attend camp in such situations.

We respectfully ask that any adult dropping off or picking up a camper and who is not fully vaccinated wear a face covering while at Hallockville.

We appreciate everyone's cooperation.

**Hallockville reserves the right to update these protocols and/or implement additional ones at any time depending on circumstances related to COVID-19 spread and associated governmental regulations and guidelines.*
